MEMORANDUM TO ALL NVWG SQUADRONS

FROM: NV/CC

SUBJECT: Mountain Fury

1. This memo supersedes the memo with the same subject dated 8 February 2004.
2. NVWG now has an approved supplement to CAPR 60-1 that requires Mt. Fury or an alternative mountain flying clinic approved by the Wing Commander to participate in mission activity as PIC in Nevada. The first mountain flying clinic is valid for four years, and subsequent mountain flying clinics are valid for eight years. This does not mean that mountain flying skills are only evaluated on an eight year cycle – in fact they are evaluated on annual Form 5 check rides and bi-annual Form 91 check rides. But the ground school is only required on the cycle indicated above.
3. The mountain clinic requirement is satisfied only when **both** the ground school and a special Form 91 focusing on the content of the course have been completed. Most members will choose to do that Form 91 in conjunction with the annual flight opportunity (so that it is funded), and must inform the check pilot that this is a Mt. Fury Form 91.
4. Recording the Mt. Fury in eServices is important as Mission Pilot status will be suspended if the required cycle is exceeded. Mt. Fury is recorded by entering the **task** “successfully complete mountain flying clinic” under the achievement Mountain Flying Certification. The achievement is not what is tracked. The **task** must be entered.
5. The Wing will issue periodic reports in advance of the Mt. Fury class to remind pilots where they stand in the required cycle.

A handwritten signature in dark ink, appearing to read 'Ralph L. Miller', is positioned above the printed name.

RALPH L. MILLER, COL, CAP
Nevada Wing Commander
